

23CSE 473 — Neural Networks & Deep Learning

Phase 1 — Marks Breakdown (for students)

Total: 25 Marks · Literature Review 5 + Phase 1 Presentation 20

This is a rough guide so you know where the marks go. Focus your effort accordingly — remember Phase 1 must show a working ~50% implementation(2- 3 models).

Part A — Literature Review (5 Marks)		
Component	Marks	What to show
Paper selection & relevance	1	5 recent (2022–2026) peer-reviewed journal papers on your topic.
Summaries in own words	1.5	One ~150–200 word paragraph per paper; no copying from abstracts.
Comparative analysis table	1	All 5 papers in one table + your own findings/inference.
Problem statement, objective & research gap	1	Clear objective and a specific gap drawn from the papers.
IEEE references & formatting	0.5	All 5 cited correctly in IEEE style; neat and proofread.
Literature Review	5	
Part B — Phase 1 Presentation (20 Marks)		
Component	Marks	What to show
Introduction & problem statement	2	Background + objective, linked to your literature review.
Methodology / architecture (block diagram)	4	Your own block diagram, chosen model, and workflow.
Dataset	2	Source, size, classes, pre-processing, and split done so far.
Implementation progress (50%)	5	Core pipeline running end-to-end; demo/screenshots; done vs pending.
Results so far	3	Your own preliminary metrics, plots, or sample outputs.
Challenges & Phase 2 plan	2	Problems faced + realistic timeline for the remaining 50%.
Readability & teamwork	2	Clean, consistent, numbered slides; every member speaks; keep to time.
Phase 1 Presentation	20	

Total

Component	Marks
Literature Review	5
Phase 1 Presentation	20
TOTAL	25

Pls Note:

- The block diagram must be your own work — AI-generated architectures/diagrams/presentations are not allowed.
- Show real results from your own code — do not copy figures or results from the reference papers.
- Do not copy abstracts or text in the literature review; write summaries in your own words.
- Keep slides clean (6×6 rule), numbered, and readable; every team member should present.
